After reviewing the evidence, I have come to the conclusion that the murderer must be one and only Montgomery Money.

I have come to the conclusion based upon the following evidence:

- From examination of the telegram, we see that it was sent to Outlaw Jesse Wales on Thursday, October 19th at 8:49 AM. The time and date of the telegram indicate that it was sent at a time when we were all here in Deadwood except for Mr. Montgomery, who did not arrive until last night.

- Furthermore, if you examine the telegram, you will see that it is postmarked from St. Louis where Mr. Montgomery was on a business trip.

- It is true that the actual shooting COULD have been done by the outlaw Jesse Wales, since that is who Mr. Montgomery was trying to hire to do the killing. However, the placement of the fingerprints on the gun handle show that it was shot by someone using their left hand. Because Jesse Wales' left hand is bandaged up, Outlaw Wales could not possibly be the killer.

- Upon observation, I noticed that Mr. Montgomery Money is wearing his wristwatch on his right hand, indicating that he is indeed left handed and must be the culprit.

- As for the motive behind Mr. Montgomery's shooting, we could only assume it is for the money. But upon further investigation into the article found on the cantina floor, we see that Montgomery Money was conned out of $150,000 by a con man named Victer Hammick last month. If you rearrange the letters of the name Victer Hammick, you see that the letters in that name are also the same letters as his current alias: Mitch Maverick.

- Mr. Montgomery's act was that of vigilante justice. Montgomery Money was killing as payback for the money that Mitch conned Montgomery out of and to end Mitch's career as a con man permanently. However just Mr. Montgomery may feel the killing was, the homicide was not lawful and, thus, he must be punished for his wrongdoing.
